

Earth Dynamics AI and CVMR Corporation Announce Strategic Partnership to Accelerate Global Exploration for Critical Minerals

January 21, 2026 – Earth Dynamics AI (“Earth Dynamics”) is pleased to announce that it has entered into a Strategic Partnership Agreement with CVMR Corporation (“CMVR”), a global leader in metal refining and advanced materials manufacturing. This partnership marks a significant milestone in combining world-class mineral exploration assets with the next generation of Geologic Intelligence.

The Collaboration

Under the terms of the agreement, Earth Dynamics and CVMR will pursue joint exploration projects on a global scale. CVMR will bring a robust pipeline of international exploration projects where Earth Dynamics’ proprietary Geologic Intelligence Platform will be deployed to dramatically transform complex geological data into actionable targets, significantly increasing discovery rates. As part of the strategic framework, Earth Dynamics can earn equity stakes in these joint projects, aligning the interests of both parties toward long-term value creation.

Management Commentary

“We are thrilled to partner with CVMR, a company that shares our vision for the future of the critical minerals supply chain,” said Livia Mahler, CEO Earth Dynamics AI. “This partnership validates our ability to engage with industry partners that strive to change the paradigm in the resource discovery process. Our next-generation AI platform represents an entirely new category—combining the scale of foundation models with deep geoscience expertise to reveal patterns the Earth has hidden for billions of years.”

“Exploration of critical minerals has gone through a fundamental change with the advent of AI. Earth Dynamics AI leads this revolution by expediting, identifying and confirming geological discoveries. Earth Dynamics’ proprietary system is an essential tool for CVMR Corporation,” said Kamran Khozan, Chairman and CEO of CVMR. “It reduces exploration time and delivers a high degree of certainty. We are proud to be partners with Earth Dynamics in our international projects and to be working closely with their creative and resourceful experts.”

About Earth Dynamics AI

Earth Dynamics AI is the creator of the world’s first Geologic Intelligence Platform. By integrating Geoscience Foundation Models—including Vision-Language Models (VLM) and Large Language Models (LLM)—Earth Dynamics builds generative AI agents that actively collaborate with geologists to decode the 3D structure of Planet Earth.

About CVMR Corporation

CMVR is a privately held multinational conglomerate with its headquarters in Toronto, Canada. Known for its expertise in refining high-purity metal powders and its innovative vapor metallurgy processes, CVMR is actively involved in the exploration, development, and refining of critical metals essential to modern industry and the global green energy transition.
